

Practice sight-reading with focused piano workflows.

PianoTrain combines note-reading drills, keyboard geography, and progress pages for classroom and independent practice.

— WHAT LEARNERS PRACTICE

- Recognize notes and connect them to the keyboard
- Short drills with immediate practice feedback
- Computer-key input first, MIDI when learners are ready
- Session history, pace, and mistakes after each run

— PRACTICE FLOW

- Short sessions for classroom and independent practice
- Computer-key input first, MIDI when learners are ready
- Progress, pace, and mistakes after each session

— FOR TEACHERS AND ORGANIZATIONS

- Shared TrainApps accounts, classes, and roles
- PianoTrain-specific exercises and learning data
- Prepared for school access, assignments, and progress review

— PRIVACY-AWARE BY DESIGN

- PianoTrain uses the TrainApps account and role foundation. Product data is handled per app and kept separate from other learning products.

Prepared for music classes and school rollout

LEARNER EXPERIENCE

- Note ranges, keyboard feedback, and history in one product
- Fast repetitions with immediate feedback
- Learners can review pace and mistakes

SCHOOL ADMINISTRATION

- Shared TrainApps accounts, classes, and organization roles
- Product data stays separated for PianoTrain
- Suitable for assignments, pilots, and progress review
